 Bluetooth®

Discover new possibilities in communication

For direct dialogue between individual employees and within teams.

The new CEECOACH® allows groups of 2-6 members to communicate with each other using modern Bluetooth® technology at distances of up to 500 meters (1600 ft).

The communication system that connects people even without a network – lightweight, robust and easy to use.

Especially when people can see but not hear each other, e.g. due to noise, CEECOACH® ensures a good, stable connection. The wave-shaped design enables optimum operation – even when wearing gloves.

Possible applications include working on a construction site, communicating in large industrial facilities and connecting maintenance teams.

„The perfect system for direct communication between driving instructors and students. CEECOACH simply provides the most secure, perfect support, especially during maneuvering.“

Stephan Kellner

Truck Driving School Manager
ACADEMY Fahrschule Truck & Bus Rhein Main

Partner in Outdoor Sports

Very comfortable to wear, due to low weight

Disruption-free Bluetooth® connection

Simultaneous talking via full duplex

Modern, award-winning design

Splash- and dust-proof

High-quality headset
