

CORPO

Music without borders, filled with sensitivity & warmth.

CORPO presents new Jazz in the best meaning of the phrase. Five strong personalities create their own, unique and exciting music which expands and develops. It is music from the north paired with a taste of southern latitudes, reflective with a strong expression and where the pulse has a central role.

CORPO has been working as a group since 1992, and toured in Sweden, Finland, Denmark, Norway, Belgium, Holland, France, Germany, Luxembourg, and went for a very successful tour to South-Africa in september 1999. The South-African audiences did really appreciate Corpos mix of nordic melodies and african percussion.

"A lot consists only of a bright, shining surface. We are supposed to be impressed by the brilliance. But most often it lacks substantial context. Refreshing, then, to discover music with bone and marrow, as was the fact in Piteå, to have a chance to see a musical performance that didn't need any "show or glitter", just music that lingers in the openminded listener's head. Together the musicians create a music that penetrates the listener. The different tune characters change, of course, but are all inflicted with complex rhythms and meditative levels. All the bandmembers are greatly skilled musicians, capable of conveying musical statements. Rich, intense, rhythmic and with humor. Music that stands alone. We want to hear more from CORPO!"

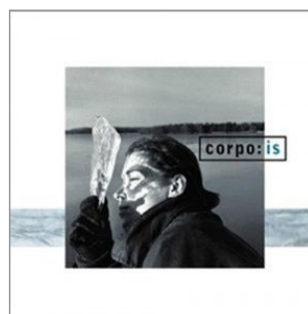

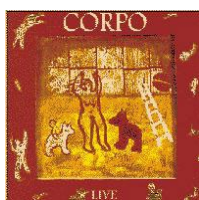

– Lars-Erik Forsgren
