The models of the MS range represent the extreme simplification of bundling machines. They are built with a solid single-unit structure and are equipped with a safety photocell which blocks the sealing bar whenever it encounters an obstacle in its path.

The MS bundling machines wrap both individual or multiple products in polyethylene film. The MS model is able to meet any wrapping requirement thanks to the wide range of options.

MAIN FEATURES

- Pneumatic pusher in line with scraper
- Hot bar – sealing bar type with film cut by cold blade
- Safety photocell that blocks the sealing bar if it encounters an obstacle in its path
- Passage opening under the sealing bar 380 mm
- Automatic upper and lower system to unwind the film reel with dragging rollers
- Heat-shrinking tunnel Length 1300 mm with air circulation system
- Adjustable speed of the conveyor belt in the tunnel
- Installed power 20 kW - Average electricity consumption is reduced by about 40% during normal operation
- Air consumption 15 nl/min
- Pneumatic components that work with non-lubricated dry air
- Switch for manual or semi-automatic operation
- Power supply: Option between 3phases 220V and 400V 3phases + N + E
- Machines compatible with Machinery Directive 2006/42/EC
