

The 6th Swedish Proteomics Society Symposium Clinical Proteomics

December 1, 2007

Karolinska Institutet, Stockholm

The 6th annual meeting of the Swedish Proteomics Society will have its focus on Clinical Proteomics including biomarker discovery and recent developments in instrumentation and technologies. The 6th Symposium will present lectures from top scientists in the proteomics field, several with a strong clinical background. The SPS annual meeting is intended for all those interested in proteomics and its clinical applications, not only scientists active in the field, but also students, researchers in related areas, physicists, R&D managers, technicians and company representatives.

This year the SPS meeting is coordinated with (and follows directly) a Minisymposium in the series Frontiers in Medicine, November 30, Nobel Forum, Karolinska Institutet, supported by the Nobel Assembly and with the title Proteome Analysis in Medicine.

Confirmed Speakers

Donald F. Hunt, University of Virginia
Ruedi Aebersold, Swiss Federal Institute of Technology
Peter Roepstorff, University of Southern Denmark
Monique Slijper, University of Utrecht
Peter James, Lund Institute of Technology
Gert Auer, Karolinska Institutet
Nancy Pedersen, Karolinska Institutet
Serhiy Souchelnytskyi, Karolinska Institutet
Bo Franzén, AstraZeneca R&D Södertälje
Henrik Gonzales, Karolinska Institutet
