

## Creative textile design – with new HT2 TEXTIL!

Gütermann creativ HT2 TEXTIL is the ideal adhesive for creative design. It is ideally suited to all sorts of textiles, such as cotton, denim, linen, felt, wool, ribbons and many more.

It is wash-resistant in temperatures of up to 90°C and therefore HT2 TEXTIL is ideal for fabric seams and repairs to clothing. Appliqué work and decorations become child's play!

HT2 TEXTIL dries colourlessly and forms a flexible adhesive film. Ironing maintains the high wash resistance of the adhesive. Freshly applied adhesive can be removed with water.

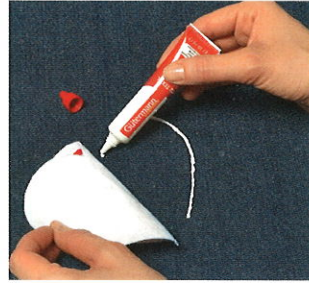

The robust plastic tube makes it simple to apply an even coating, without drips.

Art. 639834  
20 g/19 ml

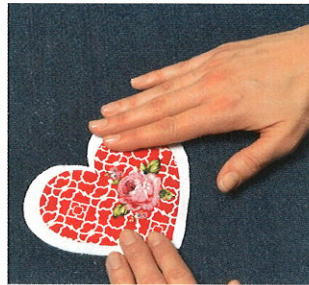

- Glues textiles such as cotton, denim, linen, felt and many more
- Solvent-free
- Resistant to washing and dry-cleaning

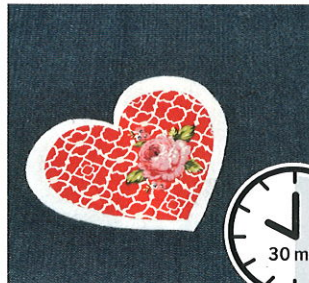

## Instructions for use:

Spread HT2 TEXTIL sparingly on one side of the fabric and allow to dry for 5 minutes.

Place the fabric pieces together. With fine fabrics, smooth the fabric layers, without applying pressure. With firmer fabrics, such as denim, press together lightly.

Then leave glued textiles to dry for 30 minutes.

Iron the glued seam to improve its stability. When ironing, select the correct iron setting for the type of fabric and iron for about 10-15 seconds with a gentle motion.
