Fonden

Månaden december vart en månad av väntan för investerare, kommer USA och Kina att komma överens eller inte. Nu verkar det som att svaret blev nja, de kommer att signa ett första avtal men de flesta frågorna av magnitud skjuts på framtiden.

Vi började att köpa på oss halvledarutrustnings aktier i oktober och har under fjärde kvartalet fortsatt att addera till positionerna. Vår vy är att 2020 och 2021 blir 2 väldigt starka år för sektorn drivet av 5G, AI och jakten på smartare produkter som bilar. Aktierna handlas dock som väldigt konjunktur känsliga vilket gör dem lite volatila på kort sikt. Detta drabbade oss något i december och Thyra Hedge slutade ner -0,18% under månaden. Den underliggande efterfrågan ser dock väldigt stark ut och vi tror på positiva signaler i rapporterna som kommer nu i januari.

THYRA HEDGE

Investerings strategi

THYRA Hedge är en koncentrerad aktiebaserad long/short UCITS fond med globalt fokus inom framförallt teknologisektorn. Fonden investerar i mellan 20-30 bolag och söker kontinuerligt eftersträva marknadsneutralitet genom att fonden innehar korta positioner i enskilda aktier samt använder indexterminer för att också skydda fondens tillgångar. Förvaltningsmodellen är baserad på fundamental analys vilande mot en tematisk ansats. Fonden's fokus på riskhantering innebär att vår förvaltning präglas av begränsad volatilitet, fonden har också en mycket låg korrelation till SSSX och övriga fonder. Fondens målsättning är att leverera god avkastning i både nedåt- samt uppåtgående marknader.

In November 2006, THYRA Hedge was launched with two PM's running two separate portfolios. On October 1, 2010 we converted THYRA Hedge into a 100% technology fund. Prior performance is for the separately managed technology portfolio within THYRA Hedge. THYRA's performance is based on a fee structure of 1.5%/20%. Past performance is not an indicator of future performance and the value of investments and the income derived from those investments can go down as well as up. Future returns are not guaranteed and a total loss of principal may occur.

Formation. In November 2006 THYRA Hedge was launched with two PM's running two separate portfolios. On October 1, 2010 we converted THYRA Hedge into a 100% technology fund. Prior performance is for the separately managed technology portfolio within THYRA Hedge (Swedish vehicle).

Audit. THYRA performance is based on the Composite performance. Our auditor, Deloitte & Touche, has performed an "Agreed-Upon Procedures Engagement" on the separately managed technology portfolio. THYRA performance is based on a fee structure of 1%/20%,

Deloitte's "Agreed-Upon Procedures Engagements"

The basis for calculations of the technology fund within THYRA Hedge is based upon monthly returns from its inception in November 2006 to February 2011 under the following assumptions: 1. Return on investments in technology related equity (both long and short) 2. From November 2006 to January 2010 half of the funds assets as only half the portfolio is related to tech investments is credited to the Composite performance. From January 2010 to September 2010 the company increased their technology investments to 75% of the portfolio from 50%. From October 2010 the whole portfolio was dedicated to technology. For that reason the performance for these months has been calculated using 100% portfolio. 3. Interest income split 50% 4. Income from income and losses from derivative instruments split 50% 5. In October 2008 to December 2008 the non-technology portfolio used bank specific indices for hedging i.e the technology portfolio of the fund used 100% of the indices in that time frame and as such all derivatives are counted for. Based upon the above assumptions THYRA technology related assets have returned the above stated returns.
