

NEW REALEASE FROM SWEDISH LABEL “VSKNINGAR OCH VRÅL”:

QUANTUM LEAP - NO REASON · Release date 1 of June 2018. On vinyl and all digital plattform.

We lived in Holocen for 12 000 years before entering antropocen (the age when humanity made a print on the Earth that will never disappear. That’s mighty. We are probably on a final ride into the apocalypse within our life time.

This image that Quantum Leap creates with their debut *No Reason* is not beautiful, but the album establishes as a soundtrack to the collapse of the eco systems. It brings the darkness from the post-punk of the eighties and the energy from the garage-rock. The lyrics can be tracked down to academy as well as any alternative punk rock.

We are talking about a bastard that is taking cared of a producer (Tomas Skogsberg) that has devoted his life to aggressive darkness. This bastard is now aiming towards the contemporary trolls, power, colonisation and dinosaurs. This is the music to listen to waiting for Armageddon and/or revolution. With *No Reason* Quantum Leap, together with a few guests, invites you to a heavy and dark feast celebrating the very last setting of the sun.

BIO

Quantum Leap is based in Sweden. It is a three piece band: Björn Norberg on guitar and vocals (on records different keyboards), Andreas Hennius (bass (and live backing vocals)) and Mats Gustavsson on drums.

Quantum Leap was formed in 2015. The three members came from different backgrounds. Björn picked up his first guitar 1977 and was a guitarist in the emerging thrash and death metal scene in the 1980's and worked with electronica and fine arts from millennium and on. Andreas Hennius has been into pop since the 1980's. Mats Gustavsson is schooled in 1980's metal and played in a black metal band once.

For some reason they joined forces. 2016 they happened to meet Tomas Skogsberg of legendary Sunlight Studios (Entomed, Refused, Backyard Babies, Dismember etc) and it resulted in a quick demo and a contract with Swedish label Viskningar och Vråål (Whisperings and Growls).

The music and the lyrics are mainly penned by singer Björn Norberg.
