

**FCI experts evaluate Danish/Swedish farmdogs at IDS in Herning
November 3-4, 2018**

As part of the process, to achieve definitive FCI recognition of a dog breed, 2 experts appointed by the FCI general committee, must evaluate the breed. Items to be evaluated are - among others - the homogeneity of the breed and temperament.

On July 24th, 2018 SKK and DKK received a reply from the FCI, that this evaluation will take place in the frame of the Herning shows in Denmark, 2018.

Dansk/svensk gårdhundeklub and Rasklubben för dansk-svensk gårdshund therefore encourage members to participate in Herning if possible, so the FCI experts can have a representative group of breed typical dogs, to base their evaluations on.

The approval for final recognition is not taking place at this show, but the result of the experts' observations and evaluations will become a part of the final application. Which after this will continue to be processed by the FCI.

See you in Herning!
