

## 25-year warranty

A unique long-term 25-year Extended Product Warranty and Applications Assurance Program is provided for all certified Eurolan projects.

When installed per ISO/IEC 11801:2002(E), EN50173-1, TIA/EIA-568-B cabling standards Solution Eurolan Europe AB will support Link and Channel Warranty and Application Assurance Program for both copper and fibre optics.

### System Performance Warranty

The links\channels of the Certified Cabling System will comply with the category of end-to-end performance which the system is certified to.

### Application Assurance Warranty

The Certified Cabling System will be free from defects which prevent the operation of standards based applications\ protocols over the category of end to-end performance which the system is certified to.

When installation is completed, the Eurolan Certified Partner Company, in order to obtain the Warranty on the Eurolan SCS, submits (in electronic form) the following documents:

- registration form for getting a warranty on a Eurolan SCS to be certified, with information about the object;
- the results of testing the links according to permanent link or channel scheme (any file format);
- the list of components that have been used (without their prices);

If no errors are detected and no objections made, the Warranty on the Eurolan SCS is issued within 10 days.

The warranty period starts since the date of installation completion indicated in the Registration form.

Eurolan products must be installed per appropriate Eurolan instruction sheets.

Note: All networks shall be installed per applicable standards and manufacturer's guidelines.
