

# Patent Family #1 “Tamper”

*A Method and a Device for Detecting Intrusion into or Tampering with Contents of an Enclosure*

## Areas of Application

- Loss prevention
- Tamper evidence
- Detection and alarm of intrusions
- Track and trace
- Product surveillance
- Access control
- Product authentication

## Benefits

- Real-Time detection of intrusion with non-erasable time-stamp
- Detect, prevent, and register data of
  - counterfeiting, theft, tampering, adulteration, exchange, smuggling
- Non-erasable/non-replicable unique seal IDs
- Access control
- Non-destructive
- Goods and seal protection by complete circumvention of goods and seal
- Brand protection and preserved brand value
- Suitable for integration with systems of surveillance and environmental control
- **Cost advantages:**
  - Reduced loss of goods
  - Reduced number of liability claims
  - Cost effective
    - 1/100 of cost of comparable seals, only one level protection needed, reduced labor costs
