

CITYLINE

22 Places City Bus

These are city class buses good for transporting passengers both sitting and standing. Exploitation conditions of these buses are very difficult, so the equipment installed in them is of peculiar reliability. They are always made with electric entrance doors and,

if there is a need, they can be made with platforms or ramps for loading disabled in wheelchairs. The seats of such buses are durable and decorated with materials easy to clean. Outside and inside digital indicator boards are installed to provide information.
