

Fund Strategy

Origo Quest 1 is an alternative investment fund (AIF) that invests primarily in Nordic small and medium-sized companies, with an emphasis on Sweden. In addition, the fund takes short positions in individual stocks and indices to optimize returns and risk.

Our investment approach is based on an active, long-term, fundamental strategy in order to identify value-creating opportunities in small and medium-sized companies. The fund's portfolio is concentrated and could therefore deviate from the general market direction. The fund will have a long bias (net exposure) over time. The goal is to deliver competitive risk-adjusted return over rolling five years.

Manager Comment

Most of the recent macro statistics, possibly with the exception of the Chinese, confirm that the world economy has entered a quieter phase. Despite several obvious risks (declining economies, trade war, Brexit, Europe's debt problems, etc.), the World Index rose by another 1.4% in March. **The risk appetite has increased rapidly**, measured as the VIX index, and is now **back at the level it was before the equity market decline started in October**. The Nordic Index and the Small Cap Index also rose by about 1% during the month. **Origo Quest 1 lost 2.4% in March, thus summarizing the increase in the first quarter to 5.9%. A slight decline in the long portfolio affected performance**, where among other things. Paynova contributed negatively after informing the market of an upcoming rights issue. The fund's **short positions**, i.e. companies that we consider to have long-term challenges and too high a

valuation **made a positive contribution**.

The IT retailer Dustin, which is a **new investment** in the fund since November, has a strong operational momentum and an appealing valuation. The company is a **pioneer in Swedish e-commerce** and started its business already in 1985. During the past 12 years, it has successfully expanded by entering into new markets. We expect the **profit outlook** for the next 3-5 years to be **very good** and we expect continued growth in new markets and gained market shares in the core segment, small/medium-sized companies. The threat from **Amazon** and **Alibaba** have **pushed the market valuation of several traditional and online retailers lower** over the past year, but we believe that an **increased focus on SaaS (Software as a Service) and cloud services is an opportunity for Dustin**.

Return

Class	NAV	1 mo	2019	Start
A	175,41	-2,4%	5,9%	82,2%
B	148,85	-2,4%	5,9%	58,5%
C	179,84	-2,4%	5,8%	43,7%

Exposure¹

¹ The chart visualises the relation between the fund's long and short positions in equity and equity-like financial instruments in relation to the assets under management.

Annual return since inception²

² The return chart shows the fund's past performance in share class A compared with the NHX Equities index. The fund launched in February 2013, hence the figure for 2013 does not represent a full calendar year. The figure for the current year shows the return until the end of the current calendar month.

Risk / Reward Profile

³ The key figures compare the fund with some chosen indices. The fund does however not have an official benchmark index. Volatility shows how returns vary over time. Beta shows adherence to each market. Sharpe and Treynor are measures that show risk-adjusted returns.

More information

Further information about the Fund's characteristics and risks as well as the conditions to invest in the fund can be found in the prospectus and fund rules, which are available at www.origocapital.se.

If you have questions, please contact us at: kundservice@origocapital.se

Origo Quest 1 is a Swedish special fund under the Swedish Act (2013:561) on Alternative Investment Fund Managers, which means that it has somewhat more free investment rules than ordinary UCITS funds. The fund is managed by Origo Capital AB, which is licensed by the Swedish Financial Supervisory Authority to manage alternative investment funds, and is thus under the supervision of the Authority.

Sustainability

We consider sustainability factors in the management of the fund and are members of Swesif. Read more about our sustainability work on www.origocapital.se.

Risk Information

Past performance does not guarantee future performance. The value of your investment may rise as well as fall and there is no guarantee you will recover your original investment. An investment in Origo Quest 1 should be seen as a long-term investment.

How to invest

Investments in Origo Quest 1 can be made in any of the Share Classes A, B or C. **Class A** suits larger investors and requires a minimum initial investment SEK 500 000. **Class B** normally distributes an annual dividend and therefore fits foundations and others who prefer an annual direct return. **Class C** is targeted to smaller investors and those who want to invest in the fund through our partners.

If you want to invest in Class A or B, you need to submit subscription documents directly to us. If you want to invest in Class C you can either contact any of the financial institutions where the fund is available or submit subscription documents directly to us. Our partners enable investment in the class through e.g. ISK, unit-linked insurance and ordinary fund account. More information on www.origocapital.se.

The fund is open for trading on the last banking day of each month. To be able to handle your order, we must have your order no later than five banking days and payment no later than two banking days before the last banking day of the month.

Fees

We charge fixed and performance-based management fees from the fund to cover the costs for the administration. The fixed fee is 1.25% for Classes A and B and 1.35% for share class C. The variable fee corresponds to 20% of the fund's excess return relative to a return threshold defined as 90 days Swedish Treasury Bills plus 5 percentage points. Underperformance for previous periods must be recovered before performance fee is paid (High Watermark Principle).

The calculations of the fund's return, risk, holdings etc. represent class A in SEK as per the last business day of the current calendar month, unless otherwise stated. When calculating past performance in Class A and B, we consider the applicable model for individual calculation of performance fee, which may result in investors being allotted compensatory fund units in connection with payment of performance fees. NAV may therefore not be representative of past performance for these share classes. The share classes are presented from the respective start: 2013-01-31 (A), 2014-03-31 (B) and 2014-12-30 (C), which means that the first year for each class does not represent a full calendar year. See www.origocapital.se for more information and a glossary.
