

The light that lets your flowers blossom.

OSRAM FLUORA® fluorescent lamps
for healthy growth.

SEE THE WORLD IN A NEW LIGHT

OSRAM

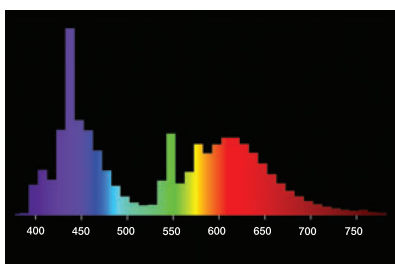

OSRAM FLUORA® – light for healthier plants.

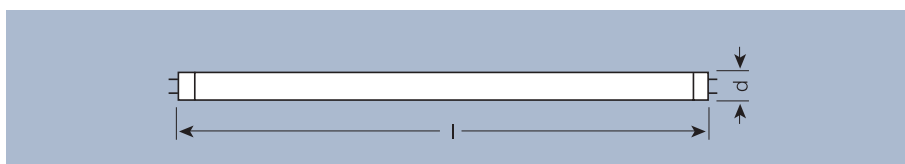

The light from OSRAM FLUORA® fluorescent lamps is particularly strong at the blue and red ends of the spectrum and thus is ideal for promoting photo-biological processes in plants. The result is healthier plants. OSRAM FLUORA® lamps are used wherever plants do not receive enough natural daylight, for example over feature planting in shopping centres, offices, hotels and the home, and also for florists' shops, greenhouses and aquariums.

OSRAM FLUORA® lamps are the light sources for plants and aquariums. They emit most of their light at the blue and red ends of the spectrum. Their spectrum is perfectly matched to that required for photo-biological processes. The result is healthier plants. Plants really thrive under FLUORA® light even in rooms where there is little or no natural daylight.
