

*Diana***Talks touch black model – Manual**

Congratulation to your purchase of *Diana***Talks touch black version**, a high quality sound 6 language talking watch with “touch the glas function” to activate the time announcement. *Diana***Talks** can announce the time and the weekday in a digital or in an analogue version (Except for German).

Languages: German, Spanish, English, Italian, French and Dutch.

How to start:

Power on/Power off talking function:

Press and **hold** The **Talking Key, or the the middle of the watch glass**, for 3 seconds and until 2 short signals announce that *Diana***Talks** is in its power on mode. To turn *Diana***Talks** back into the sleeping mode, press and keep holding the **Talking key, or the watch glass**, for 5 seconds and until a short signal confirms it is turned into the sleeping mode. The sleeping mode function is only used for long time storage of *Diana***Talks**, all to save the battery consumption.

Please note: If activating the time announcement with the “touch on the glas function” - remove your finger within 5 seconds or the watch will turn into its sleeping mode. If so, simply start it again by pressing and holding the Talking key, or watch glass face, for 5 seconds.

How to set language and weekday:

(A sharp tool like a tooth picker or similar is needed)

1. Language: Press and **hold** the **Language/day setting** key for 5 seconds and *Diana***Talks** starts announcing in English. Select between the 6 languages step by step with the **Language/day setting** key. Lock your selected language by pressing the **Talking key**.
2. Weekday: Press and **release** the **Language/day setting** key step by step, to set correct weekday. Lock your selected weekday by pressing the **Talking key**.

How to set the reporting of hour and minute:

1. Press the **Hour setting** key step by step to set correct hour.
2. Press the **Minute setting** key step by step to set correct minute.

For quicker movement of hour and minute setting, simply press and **hold** any of those keys.

How to switch between the two versions of time announcement:

Digital time reporting = “Thursday 14.10 ”

Analogue time reporting = “10 minutes past 2, Thursday afternoon”

In all languages, except for German, you can choose *Diana***Talks** to announce the time either in an analogue or in a digital version. To switch between the two versions and which is there in each 24 hour cycle, simply pass 00.00 when setting the HOUR, and *Diana***Talks** automatically switches between analogue or digital time announcement.
