

DianaTalks Touch Black

Congratulation to your purchase of *DianaTalks touch black version*, a high quality sound 10 language talking watch with "touch the glass function" to activate the time announcement. *DianaTalks* can announce the time and the weekday in a digital or in an analogue version (Except for German and Finnish).

Languages: French, Dutch, Italian, German, Swedish, Norwegian, Danish, Finnish, English and Spanish.

How to start:

Power on/Power off talking function:

Press and **hold** the **Minute setting key** for 5 seconds and until 2 short signal announce that *DianaTalks* is in its power on mode. Use a sharp object like a tooth picker, a sharp pen or similar. To turn *DianaTalks* back into the sleeping mode, press and keep holding the **Minute setting key** for 10 seconds and until a short signal confirms it is turned into the sleeping mode. The sleeping mode function is only used for long time storage of *DianaTalks*, all to save the battery consumption.

The Talking key and the touch function.

The time announcement can be activated either by pressing the talking key or by touching the glass. Simply use your finger - touch and **release** the finger at the middle of the glass. For the touch operation your finger must stay on the glass for 0,5 seconds.

IMPORTANT: When doing the settings, do NOT hold your finger on the glass.

How to set language and weekday:

(A sharp tool like a tooth picker, a sharp pen or similar is needed)

- 1. Language:** Press and **hold** the **Language/day setting key** for 5 seconds and *DianaTalks* starts announcing in French. Select between the 10 languages stepping forward with the same key. Lock your selected language by pressing the **Talking key**.
- 2. Weekday:** Press and **release** the **Language/day setting key** to select correct day by stepping forward with the same key. Lock your selected weekday by pressing the **Talking key**.

How to set the reporting of hour and minute:

1. Press the **Hour setting key** by stepping forward to set correct hour.
2. Press the **Minute setting key** key by stepping forward to set correct minute.

How to switch between the two versions of time announcement:

Digital time reporting = "Thursday 14.10 "

Analogue time reporting = "10 minutes past 2, Thursday afternoon"

In all languages, except for German and Finnish, you can choose *DianaTalks* to announce the time either in an analogue or in a digital version. To switch between the two versions and which is there in each 24 hour cycle, simply pass 00.00 when setting the HOUR, and *DianaTalks* automatically switches between analogue or digital time announcement.
